

## KMV,KMP silencer

### Description

KMV, KMP rectangular silencers are designed for use in rectangular ventilation systems. Absorption cartridges have V-shaped ends in order to reduce the resistance of the silencer. We produce cartridges with thickness of 100, 200 and 300 mm.

The rectangular silencer consists of an outer shell and absorption cartridges, the standard material is hot-dip galvanized sheet steel. The shell ends of the silencer are equipped with z-profile.

The absorption material in KMV silencers is rock wool, in KMP it is polyester material.

On special order we also produce silencers of stainless, acid-proof or zinc-magnesium coated steel

### Marking of product

1. Marking

KMV - Absorption material is rock wool

KMP - Absorption material is polyester

2. a - Width

3. b - Height

4. L - Length

5. n - Number of cartridges

6. m - Cartridge thickness

### Example

KMV	500	x	300	-	1200	;	2	x	100
1	2		3		4		5		6
